Join us on October 24–25 for two days of dynamic discussion during our Health Information Technology Roundtable. Connect with Hall Render attorneys and health system IT, compliance and legal leadership from across the nation as we explore the latest trends and challenges shaping the health information technology industry.

In a world where change is constant, we're creating an agenda that responds directly to the needs of our health care partners. This unique format puts health care providers and systems front and center, with sessions focusing on critical issues such as data privacy and security, artificial intelligence, website tracking technologies and data management. Engage in conversation and gain valuable insights on these and other timely health IT topics.
